## **CLOSEST TO THE PIN WEEK 12**

**HOLE # 12- 'B' Flight**

**GRANT KROPFELD**

**HOLE #16 - 'A' Flight**

**DAN WICKER (29-1/2 INCHES)**

## **Putting Distance Control**

Putting distance control is achieved by an even swing. A swing of equal distance, back and forward. For example, in a three-foot putt you may move the putter back three inches and through by three inches. This stroke may cause the ball to roll some four feet. Your finish of a putt should leave you with your putter toward the cup, and your left wrist should be straight and not bent.

## **The Putting Post**

What is a golf putting post? This is where you place your head while practicing putting. This position will keep your head still. Now, you must practice rocking your shoulders up and down. Any other movement of your body will take the putt off-line. Try it.

## **Putting Through The Gate**

Place two tees in the ground with the distance between them approximately the width of your putter, plus a little extra cushion to get your putter through without touching the tees. You have your gate. Now, putt through the gate. Practice this until you can think only of the putt and not the gate. Your only focus should be on making the putts.
